DURABILITY AND QUALITY

We prioritize both safety and durability by selecting high-quality, heavy-gauge materials.

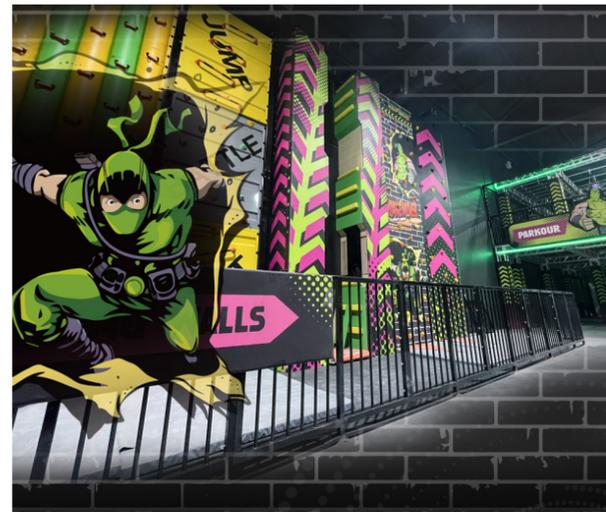

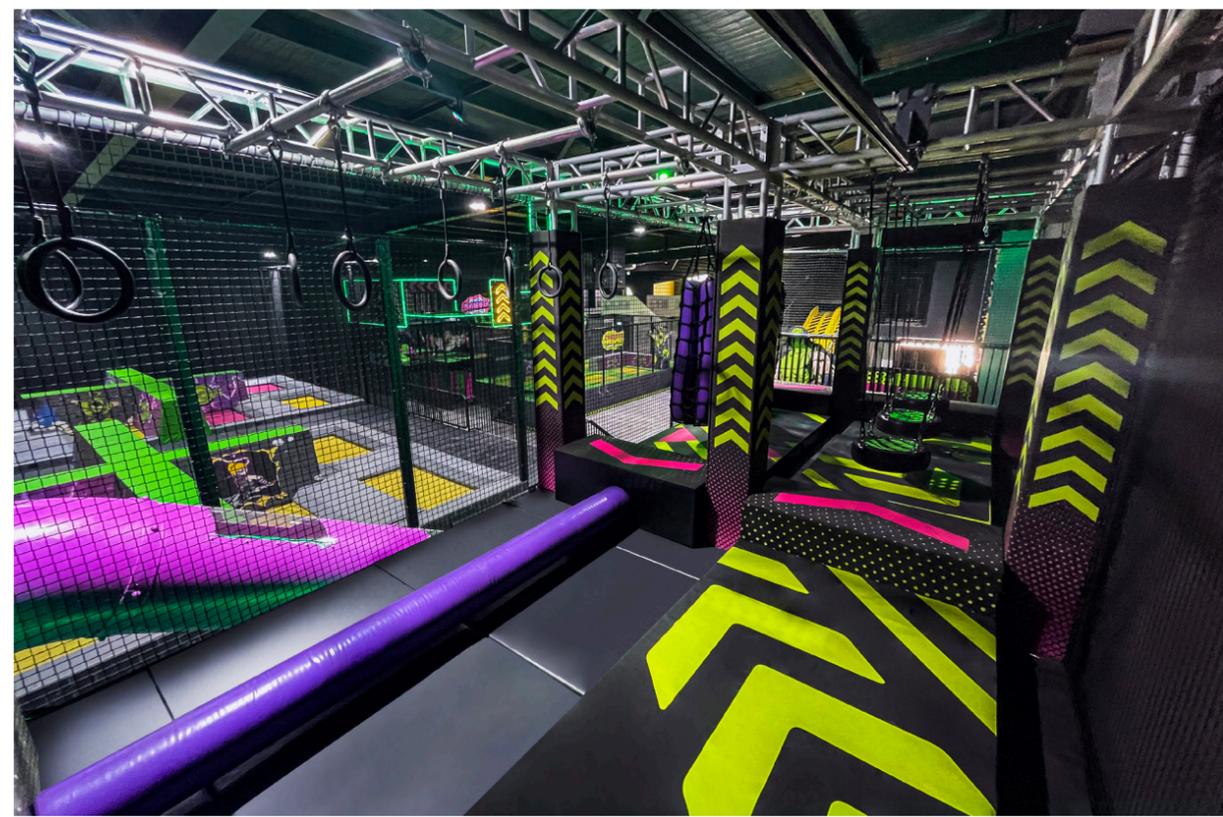

- Components are meticulously tested to meet the highest safety standards and guarantee durability.
- Trampoline paddings are made of high-durability foam with much higher density than other suppliers.
- The springs are made of robust materials, to withstand heavy use.
- Structures are built with reinforced steel to ensure stability and support.

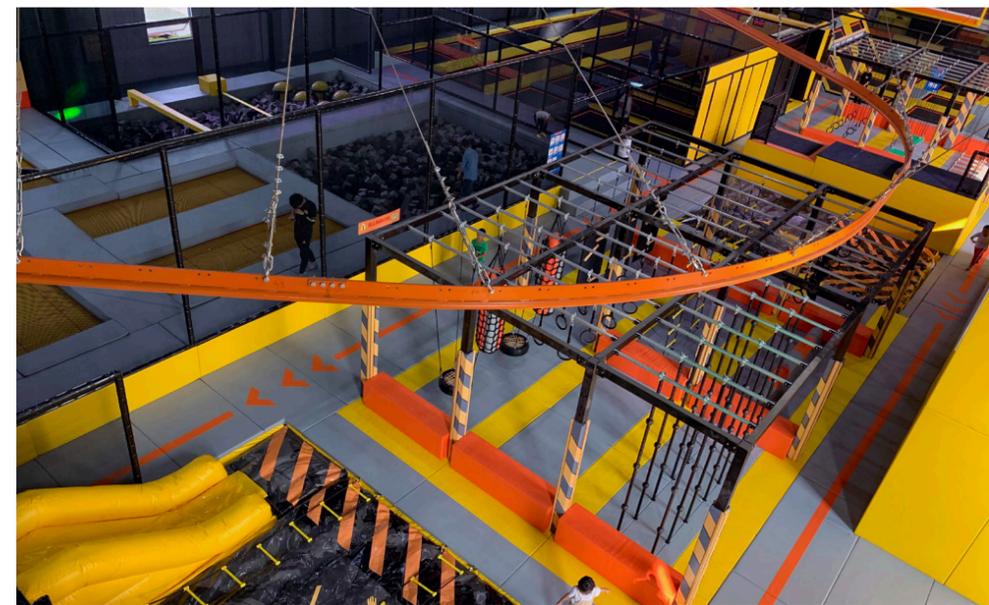

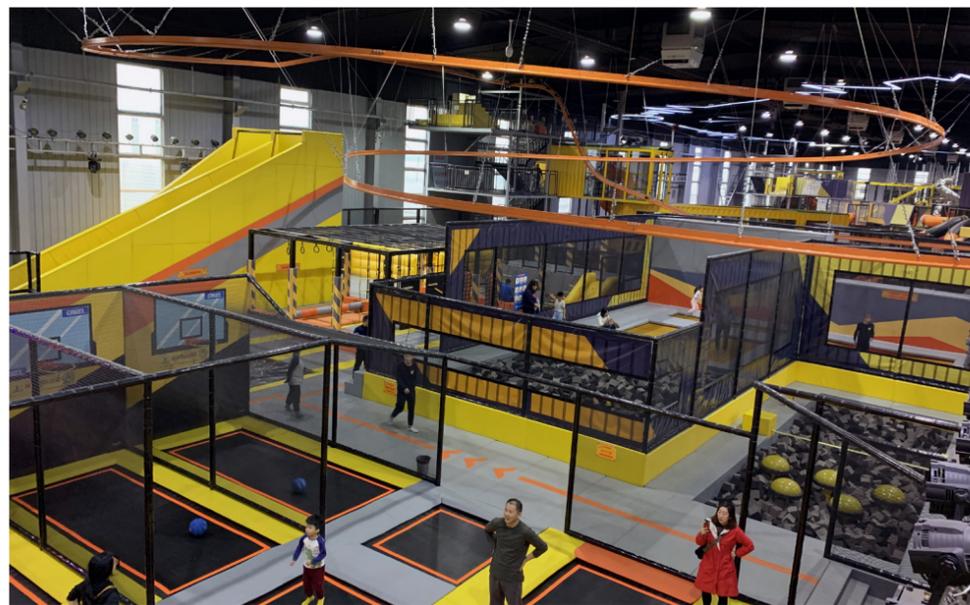

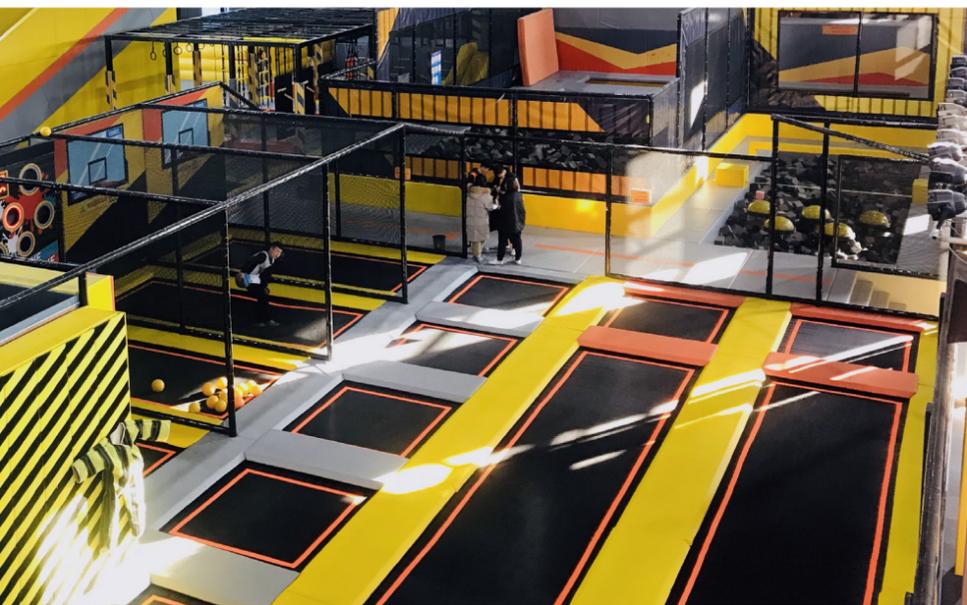

ADVANCED MANUFACTURING

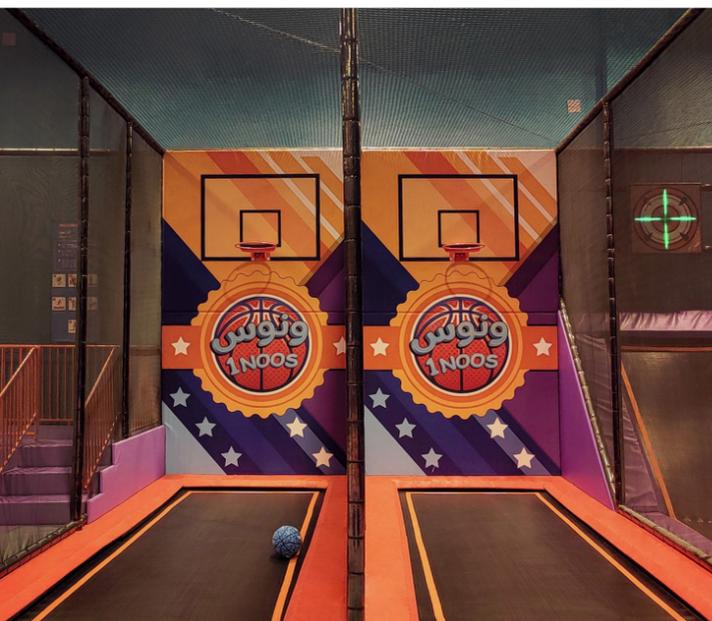

We utilize state-of-the-art equipment such as laser cutting machines, advanced welding systems to ensure precision and efficiency in production.

These machineries and the management system behind them significantly enhance efficiency and precision, making us the ideal partner for large trampoline park chains with high-volume needs.
